

PHIL 4724 Logic: From Gödel to Gödel
Spring, 2025
Course Description

The course will focus on two central results of logic, the Gödel Completeness Theorem and the Gödel Incompleteness Theorems, and their ongoing impact on developments in mathematics, philosophy, and technology.

Course Requirements and Grades

Assignments will consist of a mix of problem sets, short papers, and class presentations. Grades will be based on performance on these exercises, as well as regular engagement with class discussion.
